Experience

Plastiq
Product Designer | Nov 2018 - Present
- Design features for the Plastiq Business and Consumer web applications
- Articulate user experience by creating user flows, site architectures, and low and high-fidelity prototypes
- Conduct foundational and feature-level user research

SAP Concur
UX Design Intern | Jun 2018 - Aug 2018
- Led the design of two new features in the Concur mobile app in an Agile team, planned to be shipped in the fall
- Explored the design of a mobile app that uses machine learning to automate expense creation and management
- Acted as the sole designer on the winning Intern Hackathon team

UCSD Design Lab
Designer & Research Assistant | Jun 2017 - Aug 2017
- Led the website design for Design for San Diego, a public design competition backed by the City of San Diego
- Helped develop the front-end of the website in React.JS
- Assisted in the design of a study that observes the effects of facilitating meta-talk in Slack

UW Academic Experience Delivery & Design
UX Design Assistant | Mar 2018 - Jun 2018
- Designed a new feature in UW's personal portal, MyUW, to support the viewing and management of jointly-listed courses
- Assisted in developing a qualitative coding framework for student interview data
